C.O.P. NEWS
## COMMON OPERATIONAL PICTURE

The latest versions of LifeRing are now available for download at agisinc.com/download

AGIS Teams with HYPORI for a Secure Mobile Android Command and Control Solution

Unique Solution Features of LifeRing on the Hypori Platform.

◆ The LifeRing Android and iPhone Smartphone software is accessed from the LifeRing Server and is never physically on the Smartphone.

◆ The LifeRing mobile app can be streamed, via the Hypori Virtual Smartphone, to an iOS or Android Smartphone or tablet.

◆ LifeRing Common Operational Picture (COP), geo-positioned photos, and all tactical mission data is stored on secure servers, leaving no data-at-rest on the mobile endpoint.

◆ All LifeRing communication can be audited, including telemetry logging, with full visibility and control.

◆ Simplify mobility for IT, streamline the development, deployment, testing, and support of LifeRing capabilities with a single, centralized mobile OS version on persistent Virtual Smartphones.

◆ Leverage the power of the data center to send COP to Military Personnel and First Responders more quickly by just sending the streaming picture.

◆ All data is double AES-256 bit Encrypted; once by LifeRing and then by Hypori.

◆ NATO and C4I interoperability is provided by the LifeRing Server.

SEE LIFERING IN ACTION

Check out our latest demo simulation video online at agisinc.com showing a potential threat scenario and the use of LifeRing between a Command and Control Center and soldiers in the field.

LIFERING IN ACTION: MILITARY COMMAND & CONTROL SCENARIO

LifeRing Puts A Tactical Operations Center In The Palm Of Your Hand!!
