

LIFERING ASSIST

NATURAL DISASTER

ARE YOUR PEOPLE SAFE?

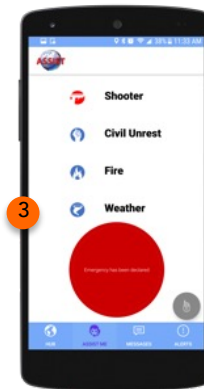

Traveling or working in certain parts of the world is more dangerous than ever. Safeguarding your personnel is a major priority. **LIFERING ASSIST** is a simple, yet robust APP for your smartphone that puts a personal panic button and geo-locator in the palm of your hands. No GPS tracking or battery use unless an emergency has been declared.

HOW IT WORKS:

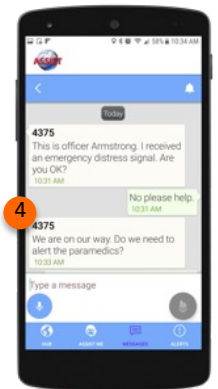

* See corresponding numbered graphics illustrating steps.

2 RECEIVE WARNING NOTIFICATION

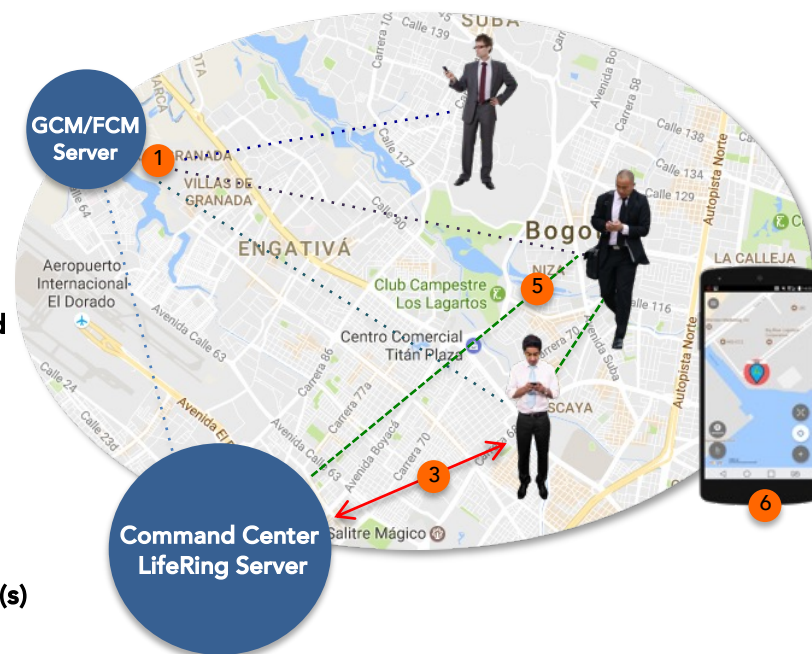

3 DECLARE / DEFINE YOUR EMERGENCY

4 CONNECTED WITH RESPONDER AND COMMAND CENTER

- 1 Command Center sends an Emergency Warning Notification to all LifeRing Assist users via the GCM/FCM Server.
- 2 LifeRing Assist users receive Notification on their devices.
- 3 A LifeRing Assist user is in danger and declares an emergency.
- 4 The LifeRing Assist user is automatically connected to the Command Center and their Communication and Tracking tools are automatically enabled.
- 5 The Command Center then dispatches the nearest responder to aid the person(s) in danger.
- 6 The Responder is connected to the LifeRing Network and automatically connected with Person(s) in Danger via voice and data.

Works with: Androids, iPhones and PCs
