

### Integrated COTS LifeRing C4I App and New Web Client C4I System

LifeRing is now available as a PC Web-Enabled Client as well as a software Application (App) package that resides on PCs, Androids, and iPhones. The LifeRing PC Web-Enabled Client is interoperable with the LifeRing App software and with a LifeRing client owned Server or an AMAZON Server. This integrated capability system assures that: 1. Data entered is seen on both the LifeRing Web-Enabled client and the LifeRing App systems, 2. Data received from the LifeRing supported tactical datalinks (JVMF, Link 16, OTH Gold, CoT, SARIR, AIS, etc.) is displayed on both the Web-Enabled clients and the LifeRing App systems and is translated and forwarded between interfacing C4I Systems so that all have an integrated COP.

There are several advantages to this integrated Web-Enabled / App approach: 1. Only need to know the URL of the LifeRing Web Browser - <https://liferingonline.com>, 2. On powering off no LifeRing information resides on the PC, 3. Large numbers of LifeRing users is possible, 4. Updating LifeRing to all users is simplified and 5. Provides the ability to have the LifeRing App's voice and video communications capabilities when needed.

### LifeRing – Complete C4I Everywhere!
