

LifeRing Partnership for Peace Strategic System in Operation

AGIS' LifeRing Strategic (Army, Navy and Air Force) Command and Control system has been Commissioned as a National Command and Control Center for a Partnership for Peace country. The Commissioning was attended by the US Ambassador, and Senior Partnership for Peace Generals including the country's Chief of the General Staff and the Commanding Officer of their Armed Forces.

"The equipment that is installed today should become the core of the control system that is being implemented in the Armed Forces of our Country", noted the Chief of the General Staff.

This Strategic system uses LifeRing software for all its C4I functions. The Logistics system was provided by SAP, the Medical system was provided by an in-country supplier. LifeRing was modified to interface to both of these systems enabling a true integrated COP and capable of NATO datalink communications.

We are also providing Tactical level C4 systems for Brigade and below Operations that will interface to the LifeRing Strategic system. The First Brigade system is already under contract; it includes Windows 10 PCs and Android Tablets and Smartphones.

Both the Strategic and Tactical Level systems operate in the country's Language of choice or English. Built-in video training is provided in both languages. See the news announcement and video below:
