LifeRing = A Complete C4I System on a Single Laptop

AGIS' LifeRing software enables you to have a complete C4I system on a single commercial Laptop PC greatly reducing the Size, Weight and Power (SWAP) required for on the move C4I. The single PC hosts four servers: Display/Track/Marker/Database/Datalink, Image, PTT and Video. The servers provide for the Client display, Command Center database, Datalink Processing (JVMF, Link 16, CoT, OTH, NATO: NFFI, ADEM, NVG and other datalinks), Datalink Translation and Forwarding, PTT, Full Motion Video, Integrated video training, and maps.

The LifeRing Laptop provides:
- LifeRing PC Client
- LifeRing Server for entire Command Center including:
- LifeRing Full Motion Video
- PTT Server and Processing
- Map Server and Processing
- Image Database Processing
- Datalink Translation and Forwarding

LifeRing Enables User to:
- Establish Data, Voice, and Video Networks
- Enter Friendly, Hostile, and Unknown Symbols on map
- Attach Text, Photos and Video to Map Symbols
- PTT by Touching Symbols
- View and Send Live Streaming Videos
- Draw Geo-Fences
- Draw White Board
- Draw Tactical Graphics
- Issue Commands
- Issue Emergency Alerts
- Issue Specific Reports

A LifeRing-enabled PC can be combined with other displays and Large Screen displays to create a ready-made Command and Control Center that communicates both up and down the Chain of Command - from the platoon to the Regiment and back down. This system has been successfully delivered by the US Army to a NATO Partnership for Peace Country.
