

### AGIS Introduces Our New Web Client

The LifeRing Web Client is now available. Fully compatible with our existing PC, Android and iOS Clients, this web-based version requires no downloads or installation. When you turn off your device no tactical data is left on the device. Our Web Client is compatible with Verizon's Software Defined Perimeter (SDP) which provides an on-demand, air-gapped, network designed to defeat network-based attacks.

For the LifeRing Military version go to <https://www.liferingmilitary.com>. For the LifeRing First Responder version go to <https://www.liferingfirstresponder.com>. Register and you will be able to immediately begin using either system. For tutorials on basic operations, please see our How To Videos at <https://www.agisinc.com/knowledge-base/>.
