C.O.P. NEWS
COMMON OPERATIONAL PICTURE
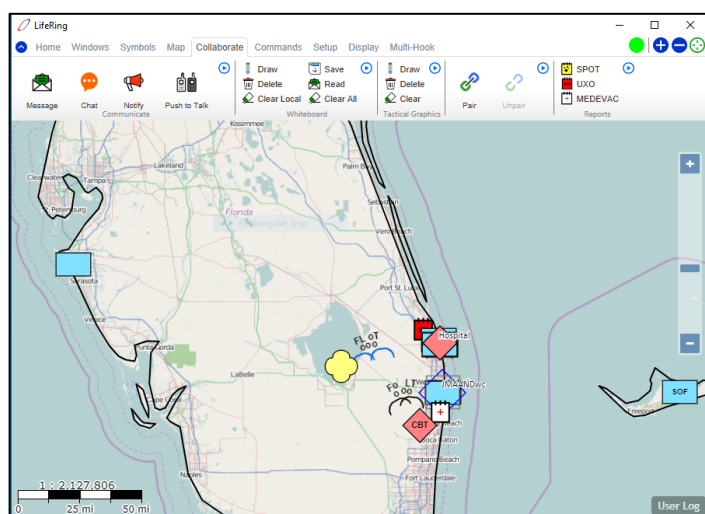

## First Command and Control System that Integrates with iOS

LifeRing enables a Common Operational Picture between Windows PCs and Android handsets. What sets us apart from other Command and Control Systems is that we also integrate with iOS. LifeRing exchanges user and marker data as well as Push-to-Talk, Chat, Messaging, White Boards and Tactical Graphics between Windows PCs, Androids and iPhones and iPads.   Our Web Client interface also works seamlessly on Mac OS with both Safari and Chrome browsers.

To try it for yourself, point your MacBook or iPhone browser
to https://www.liferingmilitary.com or https://www.liferingfirstresponder.com.
