LifeRing SOF and VIP Security Users Can Operate in Stealth Mode

LifeRing users have the option to operate in a '**Stealth Mode**' where their location is not visible to other users. This LifeRing feature was employed by a municipal law enforcement agency tasked with assisting with POTUS security during an international conference attended by dozens of Heads of State. The Stealth Mode allows the location of military SOF units and VIP security details to be invisible to other users within a LifeRing Group, while permitting the Stealth users to view the COP including the location of all other users' location and to communicate with them.

Stealth users can also set up a private LifeRing Groups so that they can monitor each others' locations while also viewing and selectively interacting with the overall COP.

COMMAND1 user in Stealth Mode. He sees all other users on the COP as well as Markers, Whiteboards, Tactical Graphics, etc.... and will receive all Chats and Messages.

These (3) Users all share the same COP, but do not see the COMMAND1 location.

LifeRing – Complete, Affordable C4I Everywhere!
