LifeRing Enables Compatibility from Smartphones to National Command Centers

Now with unparalleled processing capacity, AGIS' integrated system provides C4I Interoperability between personnel operating Smartphones to those using PCs and MacBooks and to large 250+ Console Command Centers. All can exchange digital data and are provided a Common Operational Picture (COP) on their respective devices. Maps and satellite images of the world are integrated through the Server. From a single source with warranty maintenance.

Operators can enter Mil-STD 2525 Symbols on the maps and attach data such as Photos, Files and other data. The COP with Integrated PTT, Video exchange, Chat and Messaging is provided.

Androids and iPhones   **PCs and Macbooks**   **Consoles and Large Screen Displays**

These AGIS features set LifeRing uniquely ahead of other COP systems:

1. Ability to simultaneously handle 10,000s of reports.
2. Integrated PTT and Full Motion Video from the Android and PC.
3. Commander's Mode which simultaneously displays 8 videos and the location of the sender.
4. Notify messages that appear when your Smartphone is on and, if off, when you turn it on.
5. Commands that require a response to be cleared from the screen.
6. Stealth mode where you receive all data but are not seen.
7. An integrated Compass Rose for use when GPS may not be available.
8. Integrated separate APP and Web-Client modes.
9. Built-in video training for each function.
10. Windows and Google Maps User Interfaces make it easy to learn and to use!

LifeRing — Complete, Affordable C4I Everywhere!
