The World's Largest, Most Powerful First Responder System Now Incorporates XQ Zero Trust

December 2021 - Issue #1

- Designed for Large National Disasters or small events, AGIS' First Responder LifeRing system enables "one to one" or communications with 10,000 responders LifeRing's ability to communicate using data, PTT and Video enables effective coordination between the disater responders.

- XQ enables AGIS First Responder System to meet Zero Trust NIST 800-171 advanced encryption, routing and data management compliance requirements. All data, PTT and Video is protected by double encryption.

- The LifeRing Web-Client is intuitive, easy-to-use and capable of being used by personnel unfamiliar with its operation. Built-in touch to view video training is provided for each operator function enabling those who have previously never used the system to rapidly operate LifeRing.

- AGIS' LifeRing equipped users can communicate using P-25 radios, Military radios, Satellite Communications and cellular communications in any combination enabling National Guard units to communicate with First Responders, Red Cross, Coast Guard, Utilities and others..

- All AGIS/XQ MDDL First Responder users operate in a Zero Trust environment assuring security, data privacy and integrity.

- The integrated AGIS/XQ system operates seamlessly on Android, iPhone, PC and Apple MacBooks.

- The AGIS/XQ integrated Zero Trust system operates on Cloud or on-Premise Servers with soon to be released automatic fail over between servers.
