The World's Largest, Most Powerful C5ISR System Now Incorporates XQ Zero Trust

November 2021 - Issue #5

- XQ enables AGIS' MDDL C5ISR System to meet Zero Trust NIST 800-171 advanced encryption, routing and data management compliance requirements. All data, PTT and Video is protected by double encryption.
- All AGIS/XQ MDDL C5ISR users operate in a Zero Trust environment while processing 10,000s of Real Time Radar, ELINT, UAV, AIS, ADS-B, GPS Tags, Weather and Intelligence data from military and commercial satellite sensors.
- AGIS' MDDL C5ISR system operates on Android, iPhone, PC and Apple MacBooks.
- XQ Zero Trust enables the exchange of C5ISR data and PTT and Video with 1,000s of other AGIS MDDL systems, all within a Zero Trust environment.
- The AGIS MDDL system enables a synchronized COP between Link-16, JVMF, OTH Gold and NATO NFFI, ADEM and NVG users.
- AGIS' MDDL PC operators can view and can interact with the totality of the data being received by the interfacing C5ISR systems.
- The AGIS' XQ integrated Zero Trust system operates on Cloud or on-Premise Servers with soon to be available automatic failover between servers.
- Can't believe it? See the redacted U.S. Defense Information Systems video --- <https://www.youtube.com/watch?v=Y1lyMA7wsls>
