

LifeRing's Worldwide C5ISR ELINT Processing

AGIS' C5ISR system is the only known C5ISR capable of processing 20,000+ near real time sensor reports along with satellite imagery from various sources and satellite ELINT data, to provide Worldwide Command and Control capabilities to countries from Europe to Asia. We have in the past fused ELINT from multiple sources to provide more accurate and comprehensive intelligence to U.S customers and can include commercial unclassified ELINT information to further improve Situational Awareness. Using ELINT combined with other sources can provide both civilian and military users with more accurate and meaningful data.

AGIS Processing 10,000 Satellite Emitter Locations in the South China Sea with the blue "hooked" symbol data for one of them in the readout window.

Zoomed in display of the 'hooked' radar return with data and associated location error ellipse.

Correlating radar emitter data with satellite imagery

AGIS' ability to automatically create radar coverage diagrams depicted in our last C.O.P. NEWS is especially useful for amplifying received radar reports allowing analysis as to when radars will acquire an aircraft.

AGIS' C5ISR capability to also simultaneously monitor and display worldwide ship (AIS) and aircraft (ADS-B) transmissions further amplifies worldwide our C5ISR capability. This enhanced capability is made operationally useful by AGIS' Multi Domain Data Link (MDDL) fabric which enables the exchange of this data with current US Army, Navy, Air Force, Marine Corps and NATO C5ISR systems thus creating a synchronized COP for all to use to enhance Joint Forces Operations.

AGIS' ability to provide a low cost C5IS system that, in addition to the normal C5ISR capabilities includes PTT and Video and multi-lingual controls, makes this system ideal for those who do not have a state-of-the-art C5ISR system. Furthermore, it is available as an App or as an interoperable Web-Client.

To get the latest version of any of our Thick client apps, go to www.agisinc.com/download. To try our Web client system, go to either www.liferingmilitary.com or www.liferingfirstresponder.com.
